

Bank Austria Disclosure (Pillar III) as at 31 March 2025

Table of Content

Disclosure of capital requirements (Article 438 CRR)	3
Disclosure of liquidity requirements (Article 451a CRR)	10
Declaration by the Manager charged with preparing the financial reports	13

Notes

In this report, "Bank Austria" and "the Bank Austria Group" refer to the Group. To the extent that information relates to the parent company, "UniCredit Bank Austria AG" is used.

In adding up rounded figures and calculating the percentage rates of changes, slight differences may result compared with totals and rates arrived at by adding up component figures which have not been rounded off.

Explanatory notes on figures/tables:

- a dash ("-") means exactly zero,
- a zero means that this value in the respective numerical unit (e.g. in € million) rounded to a zero.

Disclosure of capital requirements (Article 438 CRR)

The capital planning, budgeting and monitoring processes within UniCredit Bank Austria are carried out by the responsible local functions and are in line with the respective UniCredit Group guidelines.

The calculation of capital requirements is based on the regulatory framework known as "Basel 4", adopted as a result of the Regulation (EU) 575/2013 on prudential requirements for credit institutions and investment firms (Capital Requirements Regulation - CRR) and subsequent updates, and in the Directive (EU) 2013/36 on access to the activity of credit institutions and the prudential supervision of credit institutions and investment firms (Capital Requirements Directive - CRD) and subsequent updates, also according to their adoption by Austrian Laws.

The regulation envisages the following breakdown of Own Funds:

- Tier 1 Capital (T1), composed of: Common Equity Tier 1 Capital (CET1) and-Additional Tier 1 Capital (AT1);
- Tier 2 Capital (T2):
- The sum of Tier 1 Capital and Tier 2 Capital are the Total Own Funds (Total Capital)

Basel 4 requires a minimum of Common Equity Tier 1 Capital of 4.5% of RWA, Total Tier 1 Capital of 6% and Total Capital of 8%.

In addition, all banks will be required to hold a capital conservation buffer consisting of Common Equity Tier 1 Capital of 2.5% on top of the new minimum requirements. This leads to an effective capital requirement of 7% Common Equity Tier 1 Capital, 8.5% Tier 1 Capital and 10.5% Total Capital.

Member States can set an additional buffer requirement to dampen excess lending growth (counter-cyclical buffer up to 2.5%). The Austrian Capital Buffer Regulation (*Kapitalpuffer-Verordnung – KP-V*) set the counter-cyclical capital buffer for major loan exposures in Austria at 0% from 1 January 2016. In addition, the authorities can set systemic risk buffers (SyRB) and capital surcharges for systemically important banks.

The SyRB for UniCredit Bank Austria Group in 2024 was set at 0.50% and the surcharge for systemically important banks is 1.75%, both have to be applied cumulatively starting with June 2021, in accordance with CRD V.

For 2025, for UniCredit Bank Austria Group the values for the SyRB (0.50%) and for the OSII buffer (1.75%) have been confirmed starting with 1.1.2025. Moreover for 2025 FMSG (the Austrian Financial Market Stability Board) recommended to maintain the Countercyclical Buffer at the level

As an outlook for the second part of the year, starting with July 2025, a sectoral systemic risk buffer of initially 1% of Risk Weighted Assets related to specific Commercial Real Estate assets will be applicable.

Regarding SREP capital requirements, UniCredit Bank Austria AG shall at all times meet, on an individual basis and on a subconsolidated basis a total SREP capital requirement (TSCR) of 9.75% (which includes a Pillar 2 additional own funds requirement of 1.75%, to be held in the form of 56.25% of Common Equity Tier 1 (CET1) capital and 75% of Tier 1 capital, as a minimum).

In Austria, the BRRD II was transposed into national law by amending the Bank Recovery and Resolution Act (BaSAG) as published on 28 May 2021.

The MREL regulation based on the "Total Liabilities and Own Funds" (TLOF) was cancelled and replaced by the calculation based on the RWA (Total Risk Exposure Amount, TREA) and the Leverage Ratio Exposure (LRE).

The regulatory MREL interim target is binding since 1 January 2022.

For 1Q25, the Internal MREL Target on RWA (TREA) is 22.85% + Combined Buffer Requirements and the Internal MREL Target on Leverage Exposure (LRE) is 5.90%.

The above internal MREL targets are applicable at UniCredit Bank Austria AG individual level only.

The CET1 ratio transitional for UniCredit Bank Austria Group as of 31.03.2025 decreased by -47bp vs YE24 to a level of 18.87% due to regulatory CET1 decrease €-138m (-41bps) mainly related to higher regulatory deductions and RWA increase by €+111m (-6bps).

Bank Austria continues to have a solid capital base to meet the own funds requirements pursuant to Art. 92 CRR / Art. 129 CRD IV.

Internal Capital Adequacy Assessment Process (ICAAP)

Bank Austria deems as priority the activities of capital management and capital allocation based on the risks taken, with the aim of expanding business activities with respective value creation. Therefore, the capital and its allocation are of relevant importance in the definition of corporate strategies.

The ICAAP forms an integral part of the Pillar 2 requirements according to CRR. Maintaining an adequate level of capital is a core objective of Bank Austria, it is measured by the Risk-Taking Capacity (RTC). Bank Austria's RTC calculates the economic risks across all relevant risk types and relates them to the available financial resources (AFR) which are held to cover such risks.

The risk side of the calculation serves to determine the economic capital requirement from unexpected losses with regard to credit, market, operational and other risks. The risk is calculated in a going concern approach and at a confidence level of 99.90%. The economic capital requirement is then related to the AFR, which are based on regulatory own funds and additional coverage positions available. The RTC is accounted for in the Risk Appetite Framework (RAF) of Bank Austria. The RAF defines, from a strategic perspective, the risk level that Bank Austria is willing to take on by setting limit, trigger and target for the respective Key Performance Indicators (KPIs). This setup enables management at any point in time to monitor the appropriateness and sufficiency of Bank Austria's economic capital adequacy.

The management board and the risk committee are informed at least quarterly on the results of the risk-taking capacity, showing also the development of the single components (economic capital, AFR). The calculation, monitoring and steering of the RTC forms a fundamental part of the management of risk and capital at Bank Austria.

Compared to the end of 2024, risk-weighted assets (RWA) increased slightly from €33.6 billion to €33.7 billion, in particular:

- €1.3 billion decrease in credit risk is mainly due to to exposure reduction in Retail and Corporates business and the net effect of the implementation of the new local EAD model.
- €1.4 billion increase in operational risk, mainly driven driven by the implementation of the new Basel 4 model.

The template EU CMS2 (first-time publication in this report) provides an overview of the weighted exposure amounts focusing only on credit risk, reporting the breakdown by exposure class as defined in article 147 CRR3.

The information reported in the columns is the same as in template EU CMS1, except for column b, which includes actual RWEAs arising from IRB exposures, re-calculated with standardized approaches (instead of the actual RWEAs calculated with standardized approaches).

TOTAL OWN COMPREHENSIVE FUNDS REQUIREMENTS DESCRIPTION VaR **SVaR** OTHER TOTAL RWEAs 1 RWEAs as at 31.12.2024 158 361 42 (88) (201) Regulatory adjustment RWEAs as at 31.12.2024 (end of the day) 160 230 18 69 Movement in risk levels (19) (60) (79)(6) Model updates/changes 4 Methodology and policy Acquisitions and disposals Foreign exchange movements 12 151 RWEAs as at 31.03.2025 (end of the day) 50 101 34 421 118 303 Regulatory adjustment 8 RWEAs as at 31.03.2025 168 572 46 403

The quarterly increase was mainly driven by methodological updates and new XVA hedges.

Disclosure of liquidity requirements

Disclosure of liquidity requirements (Art. 451a CRR)

Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR), introduced by Basel 3 prudential regulation, is a short time indicator which aims to ensure that credit institutions maintain an adequate liquidity buffer to cover the net liquidity outflows under severe conditions of stress over a period of 30 days.

The regulatory framework applied is represented by:

- with reference to the requirements to be met:
- CRR Article 412 "Liquidity coverage requirement";
- Commission Delegated Regulation (EU) 2015/61 of 10 October 2014 that lays down rules that specify in detail the liquidity coverage requirement provided for in CRR article 412(1). In particular, the requirement that all institutions authorized has to meet is equal to 100%:
- Commission Delegated Regulation (EU) 2018/1620 of 13 July 2018 amending Delegated Regulation (EU) 2015/61 to supplement Regulation (EU) 575/2013 of the European Parliament and the Council with regard to liquidity coverage requirement for credit institutions;
- Commission Implementing Regulation (EU) 2021/451 of 17 December 2020 laying down implementing technical standards for the application of Regulation (EU) 575/2013 of the European Parliament and of the Council with regard to supervisory reporting of institutions and repealing Implementing Regulation (EU) 680/2014 (Text with EEA relevance);
- with reference to the disclosure information to be published:
- CRR Article 435 which defines the disclosure requirements for each separate category of risk, including the key ratios (letter f);
- Commission Implementing Regulation (EU) 2021/637 of 15 March 2021, laying down implementing technical standards with regard to public disclosures by institutions of the information referred to in Titles II and III of Part Eight of Regulation (EU) 575/2013 of the European Parliament and of the Council and repealing Commission Implementing Regulation (EU) 1423/2013, Commission Delegated Regulation (EU) 2015/1555, Commission Implementing Regulation (EU) 2016/200 and Commission Delegated Regulation (EU) 2017/2295.

Therefore, disclosure is made according to the regulatory framework mentioned above.

Disclosure of liquidity requirements

Qualitative information which complements the "EU LIQ1 - LCR disclosure template"

Funding Concentration Risk can arise when the bank leverages on such a limited number of funding sources, that they become of such significance that the withdrawal of one or few could trigger liquidity problems.

In UniCredit Bank Austria AG, the governance and control of funding concentration risk is mainly performed through the setting and monitoring of metrics – managerial and regulatory - aimed at preventing potential vulnerabilities in the bank's ability to meet its liquidity obligations; such as the concentration by products and counterparties.

Regarding potential collateral calls, monthly reporting is conducted to measure the impact in terms of additionally required collateral that the bank may be required to provide given a downgrade of its own credit rating, relevant rating agencies are considered.

As far as the currency mismatch is concerned, a regular monitoring of the relevant currencies and related liquid assets and net cash outflows is performed. So far, only EUR and USD resulted to be relevant at bank level. Assessment performed on potential currency mismatches between liquid assets and net outflows shows that the liquidity surplus in EUR is sufficient to cover the gap in USD. A buffer of HQLA (high-quality liquid assets) in USD was built up, aiming to partially cover the net cash flows and has been maintained to face the potential risk related with the conversion of the currency.

At the end of March 2025, **liquidity buffer** components mainly consist of reserves held at Central Bank (cash and deposits, in the amount of €5.6 billion). The other eligible component is mostly made up of central government assets and public financial institutions in total amounting to a total of about €15.2 billion.

The main component of the net liquidity outflows is related with retail and corporate deposits and the potential cash outflows related with the committed and uncommitted credit lines.

Declarations

Declaration by the Manager charged with preparing the financial reports

The undersigned Barbara Viti, in her capacity as the Manager charged with preparing the financial reports of UniCredit Bank Austria AG

DECLARES

that the information disclosed in this document corresponds to the document results, books and accounts records.

Vienna, 29 April 2025

Barbara Viti

Baltie De

Declaration pursuant to the EBA Guidelines 2016/11 on disclosure requirements under Part Eight of Regulation (EU) No 575/2013

The undersigned Hélène Buffin (Chief Financial Officer) and Barbara Viti (as Manager charged with preparing the financial reports) of UniCredit Bank Austria AG

CERTIFY

that, pursuant to the EBA Guidelines 2016/11 on disclosure requirements under Part Eight of Regulation (EU) No 575/2013 ("CRR") 4.2 paragraph – section C, disclosures provided according to the aforementioned Part Eight have been prepared in accordance with the internal control processes agreed upon at the management body level.

Vienna, 29 April 2025
