The following clause applies to prices marked "P": for securities services

"Adjustment of charges to consumers for permanent services other than payment services".

Charges for services performed by the bank on a permanent or recurrent basis under a contractual relationship with a customer (permanent services) are each year adjusted (increased or reduced) with effect from 1 April of each calendar year in line with changes in the Austrian Consumer Price Index 2000 (CPI 2000) published by Statistik Austria or in the index replacing the Consumer Price Index. The adjustment is made by comparing the index level of the month of December preceding the adjustment with the index level which is decisive for the most recent adjustment and making the adjustment in the ratio determined by such comparison, with the figure in each case being rounded off to the nearest cent. If the CPI 2000 rises, the bank may decide not to adjust the charges for its services. In such a case the bank does not waive the right to increase the charges for its services in subsequent years. Adjustments of charges are made no earlier than after two months following the conclusion of a contract.

Note:

The above adjustment clause will be applied if such application has been agreed on the basis of contracts or terms and conditions. Such adjustment of charges will not apply to charges agreed in contracts on payment services.

The most recent adjustment of charges for permanent services was performed as of July 1, 2021.
